

# Meeting Agenda

**Date:** 2016-04-22

**Facilitator:** Patrik

**Participants:** Adam, Daniel, Marcus, Patrik

## 1. Objectives (5 min)

*Resolve any issues preventing the team to continue. Short clear description.*

Store all view-related classes somewhere.

Bring the UML diagram up to date with how the program currently is.

Some of the classes lacks comments.

Divide tasks among us.

## 2. Reports from previous meeting (15 min)

*Each groupmember reports outcome of assigned issues, see also 4.*

**Everyone:** We have now implemented the first and second use case.

## 3. Discussion items (35 min)

*Discuss issues from 1 and 2, possibly new or more general issues (very short notes/keywords).*

Trackview seems to have all too many methods, might need to place them elsewhere.

There is no common UI-class with reference to all the views.

## 4. Outcomes and assignments (5 min)

*Outcomes from 3. I.e. write down what's decided and why it was decided? Sync with other documentation (add terms to wordbook). From outcomes, 1, 2 and 3, (re)assign each groupmember issues to solve.*

Move some of the methods in TrackView to GraphicsUtil.

Create a HueStewView class with all of the other views placed in it.

Complete the comments missing from some of the classes.

**Adam:** Create a HueStewView class

**Daniel:** Move the last classes which is not in right place.

**Patrik:** Move methods from trackview to graphicsutil.

**Marcus:** Bring the UML diagram up to speed.

**Everyone:** General refactoring

## 5. Wrap up

*Write down unresolved issues for next meeting. Time and location for next meeting.*

Next meeting will be held on the 26th of april at 13:37.
