Meeting Agenda

Date: 2016-05-13
Facilitator: Marcus
Participants: Adam, Daniel, Patrik, Marcus

1. Objectives (5 min)

Resolve any issues preventing the team to continue. Short clear description.
The current workflow doesn't feel like it induces flow, might need to be reworked.
During yesterdays meeting we got feedback on dependencies as well as some bugs.

2. Reports from previous meeting (15 min)

Each groupmember reports outcome of assigned issues, see also 4.
Adam: The show is now stored in a JSON file.
Daniel: A color chooser has been implemented.
Marcus: All references of color is now the correct one. The waveform image is now included.
Patrik: The audio class has been implemented.

3. Discussion items (35 min)

Discuss issues from 1 and 2, possibly new or more general issues (very short notes/keywords).
Seems as if there are too many tools doing almost the same thing, might combine some of them.

4. Outcomes and assignments (5 min)

Outcomes from 3. I.e. write down what's decided and why it was decided? Sync with other documentation (add terms to wordbook). From outcomes, 1, 2 and 3, (re)assign each groupmember issues to solve.
Adam: Create a pluginhandler for various types of lamps. Autosave on closing.
Daniel: Implement new color chooser.
Marcus: Combine move- and removetool into one tool.
Patrik: Change toolbox so that it no longer is a enum class but instead a proper class. This way we can keep track of selected frames.

5. Wrap up

Write down unresolved issues for next meeting. Time and location for next meeting.
Next meeting will be held on Tuesday afternoon, May 17th.
